SUMMARY

Strategic and energetic customer service professional with a Bachelor's in Computer Science. Seeking an opportunity within a well-established organization as a Software Engineer. Possess strong commitment to team environment dynamics with the ability to contribute and follow leadership directives accordingly. Proficient in software languages such as: JavaScript, HTML and Java.

EDUCATION

Cal State East Bay, Hayward, Ca — Bachelor's, Computer Science, 2021 - GPA 3.15

Chabot Community College, Hayward, Ca — AA Computer Science, 2018

SKILLS/PROJECTS

Data Structures/ Algorithm - Team collaboration, attempts to model a conveyor belt at a store checkout using an item class representing grocery store products. Also, a checkout class(essentially a queue) representing the conveyor belt and a driver program that represents a scenario where a customer loads the conveyor belt and items are scanned to produce a receipt. C++. Project can be accessed here:

Software Engineering - Team collaboration, attempts to simulate a game of cards being played by four players while solving the following issues: keeping track of the score to decide a winner by separating everything into classes following the rules of the game. Java.

Udemy - The Complete Web Developer in 2021: Zero to Mastery course, HTML, CSS, Javascript, React, Node.js, Machine Learning.

***Please look at the attach file to see some of my coding and Algorithm analysis.
